invention relates to a non-volatile semiconductor memory device and more particularly to a non-
volatile semiconductor memory device having a ferroelectric film as a capacitor dielectric film. 2.
Description of the Related Art In recent years, a non-volatile semiconductor memory device is
required to be downsized, speeded up, and stored more information in a unit area. As a result, a
structure of a memory cell has changed from a stack gate structure, which utilizes a conventional
planar capacitor type transistor structure, into a cylinder shape. This cylindrical shape utilizes a
capacitor of a cylindrical shape instead of a conventional planar capacitor, and has an effect of
reducing a cell area (Jpn. Pat. Appln. KOKAI Publication No. 2004-159171).Pre-Natal Attendance
and Attendance during Pregnancy Among Adolescents in a Pregnancy Planning Clinic. To examine
the relationship between pre-natal attendance and attendance during pregnancy among a cohort of
pregnant adolescents in a pregnancy planning clinic. This retrospective cohort study used medical
records from a pregnancy planning clinic. Adolescents with a live birth delivered in the study site
from 2007 to 2014 were included. Multivariate logistic regression was used to examine the
relationship between attendance and pre-natal attendance. A total of 316 pregnancies in 258
adolescents were analyzed. Pre-natal attendance was significantly related to higher attendance during
pregnancy (aOR: 1.92, 95% CI: 1.23-3.00, $p = 0.004$). Attendance during pregnancy was
significantly higher among adolescents with pre-natal attendance (aOR: 2.24, 95% CI: 1.37-3.67, $p =$
0.001). Pre-natal attendance was significantly associated with attendance during pregnancy among
adolescents in a pregnancy planning clinic. I recently read this thread on a friend's Facebook wall.
