We will update this list as soon as we find some. 6. Starling Traders (iOS) An easy and engaging simple trading game for casual gamers. Starling Traders is an easy and engaging trading game that puts you in the shoes of a Trader. Trade goods from around the world to buy or sell in a battle to the profit. Be quick to make trading decisions and you could eventually be the first to become a wealthy Trader and a star trader. This game offers features such as Trading, Free Parking and for each house you can turn any token into land via a series of card combinations. By using the tokens in the free parking lot you can get extra cards and also earn extra points that you can exchange for extra land or to increase your house up to 5x. By using what's in your shops you can increase your Trading profit and also some of the goods on the shop can be moved to your house or sold to other players. Selling goods to other players is a great way to make quick cash. The effect you will have on the outcome of other traders depends on the position you take at the end of the round. Be careful that you don't find yourself dragged into a battle for top Trader. 7. Aruana Traders (iOS) Aruana Traders is a multiplayer trading game that puts you in the shoes of a Trader. Trade goods from around the world to buy or sell in a battle to the profit. Be quick to make trading decisions and you could eventually be the first to become a wealthy Trader and a star trader. Aruana Traders features the same mechanics as Starling Traders but with a number of improvements to the gameplay. The casino plays similarly to that of Starling Traders but

Hello Engines! [Win/Mac]

Hello Engines! is a software application that was developed specifically for optimizing a website and maintaining its structure in order to boost its ranking. The application has been created with a single objective in mind: to offer users a thorough analysis of their websites and provide them with suggestions to improve its ranking. The program will perform a series of checks on the website, from the structure and links to the loading of pages and a variety of other elements. All of these will be covered during a comprehensive analysis that will also include a thorough technical inspection of the website. As it's a comprehensive software application, one will also be able to make use of all of its features during the optimization process. From website sitemap generation and traffic analysis to HTML validation and the loading of images, the utility will provide an in-depth analysis that will cover all of the web pages. Its focus on website optimization will also offer users the possibility to perform a daily and weekly SEO check on their web pages. Users will be able to schedule the checks, which will offer a custom reporting method for improved tracking and easier management. Furthermore, users can also generate detailed reports that will cover a variety of elements concerning website optimization, links checker, loading time checker and much more. These reports will be generated in an easy-to-read format and they will be presented to the users with a combination of graph and table views. All of this will come as an option to all user accounts, which will further enhance its flexibility and ease of use. A great utility for those who want to optimize their website's SEO The application will offer users a reliable tool for optimizing the technical structure of their website and for creating detailed reports of its performance. All of this will come as an alternative to managing the optimization process manually, and therefore it is an essential part of all SEO-oriented tasks for developers or site managers. Hello Engines! Additional information: Hello Engines! is designed to run in a well-organized environment that includes a series of helpful tools. One will be able to discover an array of SEO indicators on their web pages, such as website speed, Web page, Page and HTML validation, image checker, links analysis, etc. The tool will be able to produce accurate reports that cover these factors and it will also present users with suggestions to improve its performance. The application will allow one to generate reports with a combination of table and graph views that will offer easy navigation and therefore an ideal interface. After analyzing the b7e8fdf5c8

Hello Engines!

Find broken links in your websites. See which pages you have indexed in Google and which you haven't. See which content type and category your website fits into.
